# Welcome to Ace Station

where "**Equipment for rare talent**" is imagined, designed, and crafted by an elite team of top performers. And it isn't just a team, it's a legacy built on innovation, with more patents than all other racquet brands combined.

For over 42 years, we've innovated and created equipment for world champions. Whether under our own name or for other leading brands in the racquet category. Our commitment to performance and innovation has attracted apex brands like Nike, Cobra, Easton, and Schwinn Racing—leaders who seek market dominance through cutting-edge design. Innovation is in our **DNA**, and it's where we channel our passion and expertise.

**Ace Station** was created to set a new standard for the most discerning athletes who demand as much from their equipment as they give to their game. Our small-batch approach never compromises. Every detail is crafted with precision, every racket a testament to timeless performance. This is where **Pro Kennex**'s finest minds and hands converge to create something truly exceptional.

Our team of innovators, fabricators, and specialists face every challenge head-on. When you push the limits of performance, they push innovation further—because progress is the only real competition. It's in every detail, every move, and every win.

We're not for the masses. We're for the elite. For those who push boundaries and demand nothing less than the best in design and performance. **Ace Station** is built to earn the respect of the very best. That's our mission—driven by a small, passionate team under one roof.

Embrace your independence. Own your edge.

# NATURAL BORN WINNER

**Since 1975, we've celebrated talent—acknowledging its value and nurturing its potential.**

The **Black Ace** began our legacy of innovation, setting the standard for revolutionary performance at every level of play. This pioneering spirit has evolved into Ace Station—a premium range of equipment that extends our expertise beyond tennis into all racket sports. **Ace Station** is where cutting-edge technology meets advanced materials and engineered to elevate your game and sharpen your skills.

At **Ace Station** Operations, Pro Kennex is dedicated to crafting elite performance equipment, pushing the boundaries of frame design to achieve unmatched precision and quality. No expense is spared in concept, design, materials, or testing, ensuring an experience reserved for a select few.

AURELIAN  
CARBON

The **Black Ace** weaves together tennis legacy and cutting-edge innovation. This Black Ace pays homage to its legendary forebear—the first all-graphite frame to clinch a Grand Slam singles title—while pushing the boundaries of contemporary performance. Tailored for the All-Court player, the **Black Ace** delivers exceptional control and agility, allowing this player to orchestrate each point with surgical precision. Its precisely calibrated

## BLACK ACE<sup>285</sup>

Stringbed	100 in <sup>2</sup>
Racket Length	27 in
Frame Profile	21 mm
Weight	285 g
Balance	325 mm
Swing Weight	295
Rigidity	58 RA
String Diagram	16x19
Material	Aurelian Carbon, Kinetic Mass

## BLACK ACE<sup>300</sup>

Stringbed	100 in <sup>2</sup>
Racket Length	27 in
Frame Profile	21 mm
Weight	300 g
Balance	320 mm
Swing Weight	295
Rigidity	58 RA
String Diagram	16x19
Material	Aurelian Carbon, Kinetic Mass

## BLACK ACE<sup>315</sup>

Stringbed	100 in <sup>2</sup>
Racket Length	27 in
Frame Profile	21 mm
Weight	315 g
Balance	310 mm
Swing Weight	300
Rigidity	58 RA
String Diagram	16x19
Material	Aurelian Carbon, Kinetic Mass

## BLACK ACE<sup>PRO</sup>

Stringbed	97 in <sup>2</sup>
Racket Length	27 in
Frame Profile	19,5 mm
Weight	305 g
Balance	320 mm
Swing Weight	295
Rigidity	60 RA
String Diagram	16x19
Material	Aurelian Carbon, Kinetic Mass

Some players exhibit control that transcends the ordinary.

They carve out angles that defy expectation, executing shots their opponents never see coming. For these athletes, true sophistication lies in simplicity. **Ace Station** engineers have captured this essence in the **Black Ace PRO**, creating a frame where elegance meets precision. Infused with **FlexLogic** technology, a streamlined profile, and a compact head, this racket empowers the player's talent to take command of every point.

The integration of the **Kinetic System** not only reduces fatigue but also enhances recovery, allowing for prolonged peak performance through grueling matches and rigorous training.

## BLACK ACE<sup>PRO</sup>

Stringbed	105 in <sup>2</sup>
Racket Length	27,25 in
Frame Profile	23,5 mm
Weight	300 g
Balance	320 mm
Swing Weight	295
Rigidity	65 RA
String Diagram	16x19
Material	Aurelian Carbon, Kinetic Mass

The **Black Ace 105** blazes a new trail, masterfully combining the tactile precision of a player's frame with the powerful, forgiving comfort of a 105 inch head size.

Designed for players who command the court from any position, this racket delivers both pinpoint control and explosive power making it effective orchestrating points from the baseline or taking charge at the net in doubles. Its integrated **Kinetic System** reduces fatigue while setting the industry standard for arm comfort, ensuring players perform at their peak and without compromise.

With its exceptional hand feel and groundstroke potency, the **Black Ace 105** sets a new benchmark in racket design.

# WE SEARCH FOR THE BEST SOLUTIONS IN TECHNOLOGY TO RAISE PERFORMANCE TO THE MAXIMUM

## KINETIC

### TIMING IS EVERYTHING

The **Kinetic System** stands alone in the industry—not just for its unparalleled success in addressing players' arm health concerns, but for the advanced scientific approach behind its innovation. Precision-engineered chambers capture and store kinetic energy, releasing it upon impact in perfect harmony with the racket's natural energy flow.

This synchronization neutralizes shock and vibration at ball contact while expanding the power zone by enhancing frame stability. Rackets equipped with Kinetic Technology do more than maximize comfort and reduce injury risk—they dramatically enlarge the sweet spot, unlocking superior player performance and unmatched on-court comfort, far beyond any non-Kinetic model.

## FlexLogic

### BEYOND RACQUET SENSE

**FlexLogic** creates advanced bending profiles that hold the ball longer on the strings, reducing head deformation in the process.

This gives shot-makers extra time to shape their shots, while also minimizing ball dispersion for enhanced accuracy.

**-20% SHOCK -43% VIBRATION**  
**50% REDUCTION IN TORSIONAL ROTATION**

AURELIAN  
CARBON

### TOP REACTION FIBER

**Aurelian** is a groundbreaking carbon polymer weave that compresses the diverse, multidirectional graphite layers within a matrix. By stabilizing the interaction of these layers, it ensures a uniform bending profile, delivering predictable and consistent frame performance. This advanced weave allows for tighter manufacturing tolerances, setting a new standard for material engineering in sports equipment.

### ACTIVE DAMPING SYSTEM

Each **kinetic comfort cap** houses inelastic microspheres. As frame oscillations occur, these spheres effectively dampen the vibrations through friction, a process known as Non-Obstructive Particle Damping (NOPD).

This innovative technology ensures that the natural intrusion of excess vibration is mitigated, enhancing the racket's feel and performance.

HIGH-TECH ACCESSORIES TO ELEVATE THE GAMING EXPERIENCE TO THE NEXT LEVEL.

**DARK WIRE 6**  
**ULTRADURABLE CO-POLYESTER MONOFILAMENT STRING**

a six-sided string profile engineered to maximize spin and control, giving players exceptional precision. Its advanced formulation preserves a crisp, responsive feel with every shot. While highly durable, Dark Wire 6 also stands out in the arm-friendly category of polyester strings, minimizing injury risk while helping you unlock your full potential on the court.

**BLACK ACE**  
**MODERN CLASSIC LEATHER GRIP**

Better grip and feel,  
Long service life and large  
Absorption capacity of  
Leather.

ALSO AVAILABLE IN A 200 METER REEL

**ACE OF SPADE**  
**DAMPENER HIGH COMFORT**

Formulation captures unnecessary noise  
absorbs vibrations.  
Adds comfort and softens stroke.  
Stylish shape design which stays in  
place.
